To Whom It May Concern,

In February of 2016, Tommy and Josh came into my business and offered me a roof inspection to check for hail damage that may have been caused by a recent storm. They told me that if hail damage was present, they would be able to get me a new, more energy efficient roofing system, completely funded by insurance. Since I was currently dealing with leaks coming into our building, particularly our showroom that had many stained ceiling tiles, I was willing to let them on our roof.

After the inspection, they presented me with the damage and told me about their experience in working directly with the insurance company during the claims process. They told me with their expertise, along with the damage present on our roof, the insurance company would approve a full roof replacement. Knowing we had many issues with our roof, I was willing to trust them with this process.

Rugged Roofing and Construction, LLC upheld every promise given to me. Tommy and Josh were there at the adjuster meeting to help with the insurance inspection and they were kept me updated all the way until I received the settlement for the damages. My new roof was applied in a timely fashion and they made sure not to be in my business's way during the endeavor. I now have a new roof atop our building and we have had no leaks or issues with the roof. I would recommend Rugged Roofing and Construction to any business owner currently dealing with problems with their roof.

Sincerely,

Mel Weatherly
